Modelo de papel para recortar, dobrar e colar

Tamanho montado: 256 x 116 x 300 mm. 27 partes em 8 folhas de moldes.

Imprime em A4 a 100% (sem ajustar à página), em papel de 160 a 200 g/m².

Precisas de tesoura ou x-ato, régua, cola branca ou de bastão e um objeto sem ponta para vincar.

Como ler os moldes

———— Linha contínua: cortar.

- - - - - Traço-ponto: dobra em monte (a linha fica por fora, em aresta).

..... Tracejado: dobra em vale (a linha fica por dentro).

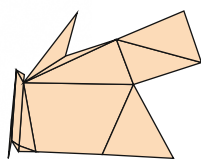

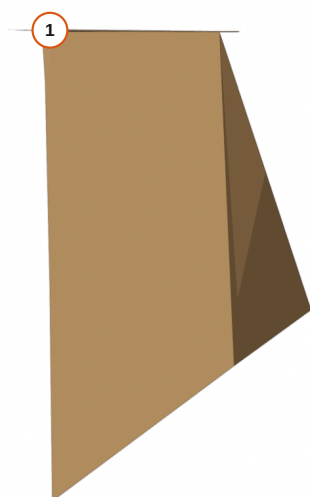

▤ Aba cinzenta: dobra-a para dentro, passa cola e cola-a por baixo da aresta com o mesmo número.

Como montar

1. Segue os passos pela ordem: cada passo mostra a parte nova a laranja, no sítio onde encaixa.
2. Recorta a parte, vinca todas as dobras com a régua e dobra-as antes de colar.
3. Cola uma aba de cada vez, apertando alguns segundos. Os números iguais encaixam um no outro.
4. As partes P são numeradas pela ordem de montagem; a mesma etiqueta está no molde e no passo.
