

Donkey Kong

Modelo de papel para montar - maior dimensão 301 mm

Medidas do modelo montado: 213 x 217 x 301 mm.

Folhas com moldes: 9. Imprime em A4, a 100% (sem ajustar à página), em papel de 160 a 200 g/m².

Precisas de tesoura, cola, uma régua e um objeto sem ponta para vincar.

Como ler os moldes

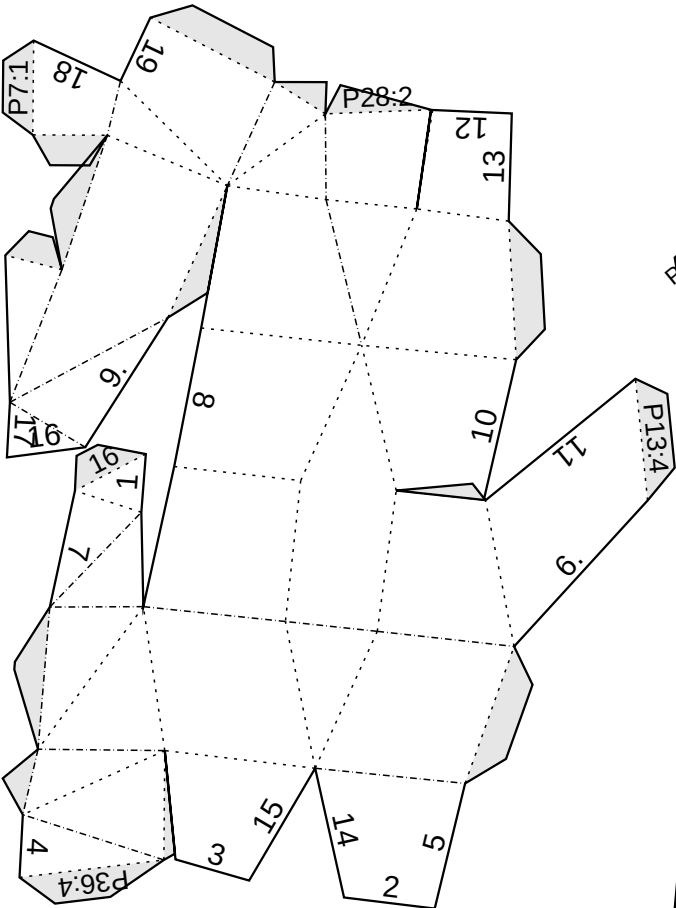

——— Linha contínua: cortar.

- - - - - Linha tracejada: dobrar. Vinca primeiro com a régua e o objeto sem ponta.

 Aba cinzenta: passa cola e cola-a por dentro na aresta com o mesmo número.

Montagem

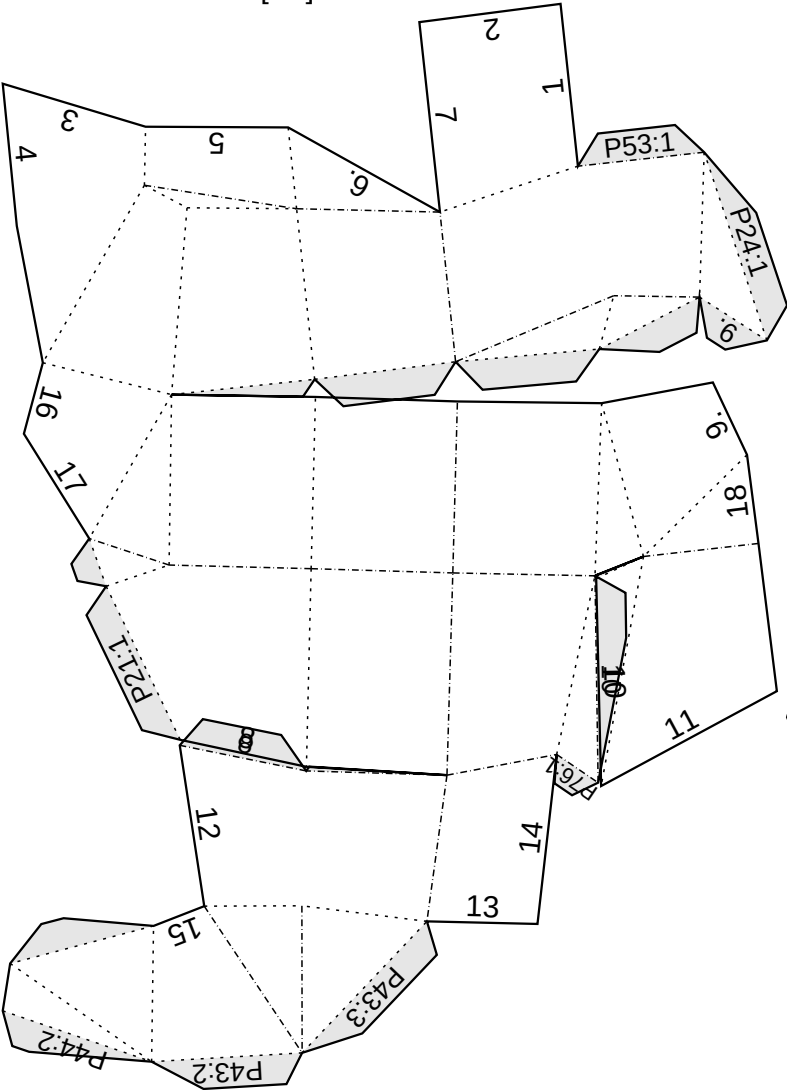

1. Recorta cada molde pela linha contínua, incluindo as abas cinzentas.
2. Vinca todas as linhas tracejadas e dobra cada uma para o lado certo.
3. Cola cada aba na aresta que tem o mesmo número, uma de cada vez, sem pressa.
4. Deixa a cola firmar antes de passar à aresta seguinte.
5. Continua até todas as arestas numeradas estarem coladas e a figura ficar fechada.
